

Nancy Rafale, RN, Per Diem at Partnerships Adult Day Center

I have been a nurse for the past 46 years and have loved every minute of my profession. 32 years of my nursing career I spent as a staff nurse on a Pediatric Unit at Yale New Haven's Children Hospital. After retiring I taught IV insertion and phlebotomy to med students and PAs. I was also a foster parent for several years for the Children's Center of Hamden. I am delighted to be on the Partnerships staff as a per diem R.N. for the past year.

I genuinely enjoy the simple things in life. I love the outdoors, nature, and all critters, domestic and wild. It is my belief that everyone young and old, no matter what age, be treated with dignity and respect always. My mission and goal has always been to provide comfort, support, and most of all, "laughter", as it is indeed the "best medicine" for the soul.
